

Subject :

- Instalasi Maven
- Build Tools

Objective :

- Memahami Maven
- Memahami Build Tools

Tugas Praktikum Sesi 1

Latihan 1 : Instalasi Maven

Langkah – Langkah Instalasi Maven : 1. Langkah pertama adalah download maven terlebih dahulu disini : <http://maven.apache.org/download.html> , download file Maven 3.0.4 (Binary zip) yang ada di kolom mirror => klik.

Download Maven 3.0.4

Maven is distributed in several formats for your convenience. Use a source archive if you intend to build Maven yourself. Otherwise, simply pick a ready-made binary distribution and follow the installation instructions given at the end of this document.

You will be prompted for a mirror - if the file is not found on yours, please be patient, as it may take 24 hours to reach all mirrors.

In order to guard against corrupted downloads/installations, it is highly recommended to [verify the signature](#) of the release bundles against the public [KEYS](#) used by the Apache Maven developers.

Maven is distributed under the [Apache License](#), version 2.0.

We **strongly** encourage our users to configure a Maven repository mirror closer to their location, please read [How to Use Mirrors for Repositories](#).

Be sure to check the [compatibility notes](#) before using this version to avoid surprises. While Maven 3 aims to be backward-compatible with Maven 2.x to the extent possible, there are still a few significant changes.

	Mirrors	Checksum	Signature
Maven 3.0.4 (Binary tar.gz)	apache-maven-3.0.4-bin.tar.gz	apache-maven-3.0.4-bin.tar.gz.md5	apache-maven-3.0.4-bin.tar.gz.asc
Maven 3.0.4 (Binary zip)	apache-maven-3.0.4-bin.zip	apache-maven-3.0.4-bin.zip.md5	apache-maven-3.0.4-bin.zip.asc
Maven 3.0.4 (Source tar.gz)	apache-maven-3.0.4-src.tar.gz	apache-maven-3.0.4-src.tar.gz.md5	apache-maven-3.0.4-src.tar.gz.asc
Maven 3.0.4 (Source zip)	apache-maven-3.0.4-src.zip	apache-maven-3.0.4-src.zip.md5	apache-maven-3.0.4-src.zip.asc
Release Notes	3.0.4		
Release Reference Documentation	3.0.4		

You can also download the current documentation, i.e. this website, as a [JAR](#) or [PDF](#).

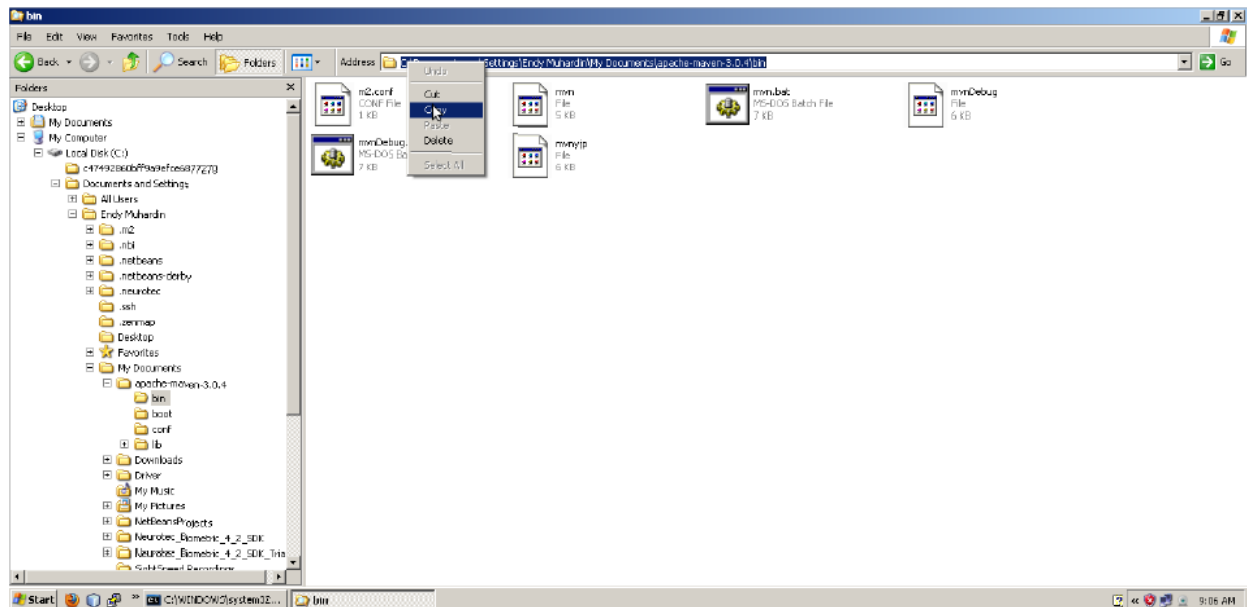

- 2 Setelah file Maven 3.0.4 (Binary zip) di klik, maka keluar browse untuk mendownload file Maven 3.0.4 (Binary zip).

- 3 Setelah keluar browse untuk mendownload file Maven 3.0.4 (Binary zip), lalu klik link : <http://apache.the.net.id//maven/binaries/apachemaven-3.0.4-bin.zip> . Maka file Maven 3.0.4 (Binary zip) terdownload.

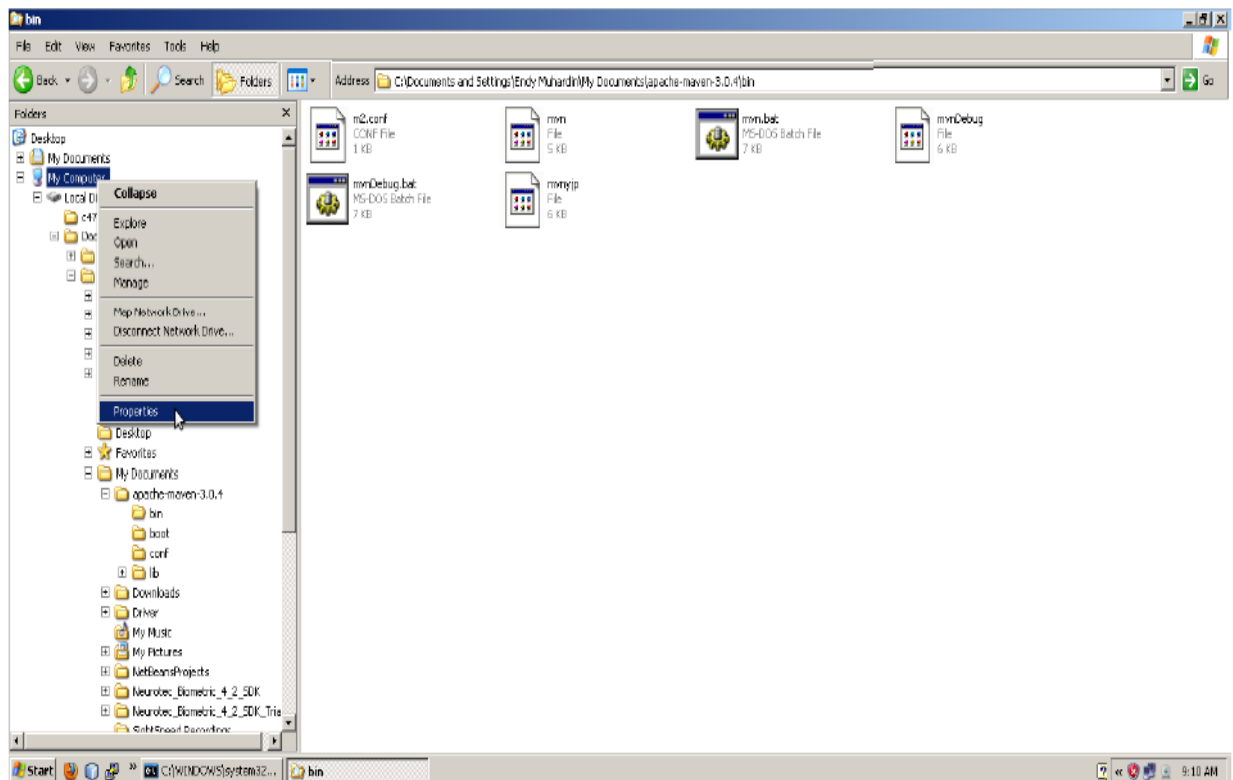

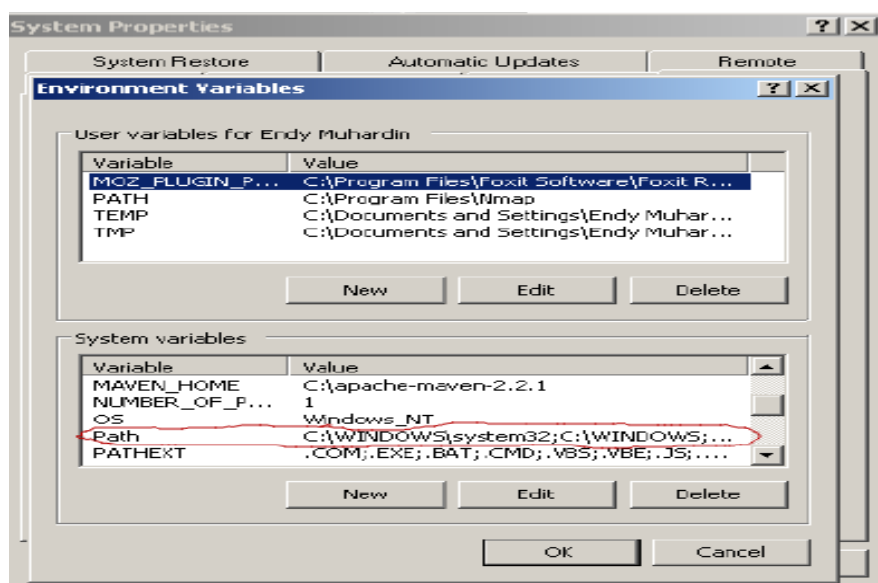

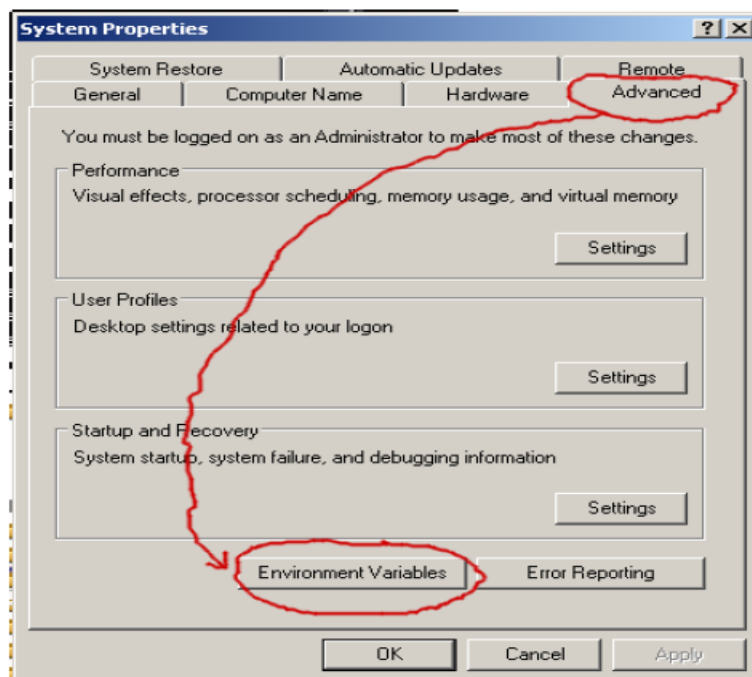

The screenshot shows the Apache Software Foundation website's download mirrors page. At the top, there's a navigation bar with links: Foundation, Projects, People, Get Involved, Download, and Support Apache. Below the navigation bar, the page title is "Apache Download Mirrors". A search bar is visible on the right. The main content area states: "We suggest the following mirror site for your download:" followed by a red circle highlighting the URL <http://apache.the.net.id//maven/binaries/apache-maven-3.0.4-bin.zip>. Below this, it says "Other mirror sites are suggested below. Please use the backup mirrors only to download PGP and MD5 signatures to verify your downloads or if no other mirrors are working." There are two sections: "HTTP" with the same URL, and "Backup Sites" which lists two backup mirror URLs: <http://www.apache.org/dist/maven/binaries/apache-maven-3.0.4-bin.zip> and <http://www.eu.apache.org/dist/maven/binaries/apache-maven-3.0.4-bin.zip>. At the bottom, it says "The full listing of mirror sites is also available."

- 4 Setelah proses download selesai, selanjutnya extract file yang sudah anda download.
- 5 Setelah file Maven di extract, lalu masuk ke folder maven hasil extract dan masuk ke folder bin : -maven-3.0.4.
- 6 Setelah anda masuk folder bin, copy address bar ke dalam path dengan cara :
- copy address bar, misalnya : C:\Documents and Settings\EndyMuhardin\My Documents\apache-maven-3.0.4\bin.

- Setelah address bar di copy, Klik kanan my computer => Properties => pilih tab Advanced => Klik Environment Variables (keluar lookup Environment Variables) => Klik 2x Path yang ada pada kolom System Variables (keluar lookup edit system variable).

- Edit variable value dengan cara tidak menghapus variable value yang ada, lalu tambahkan tanda penghubung (;) titik koma pada baris paling belakang, lalu paste address bar yang anda copy tadi di belakang (;).

- Setelah address bar sudah di copy pada Path, Lalu Klik OK (edit system variable) => Klik OK (environment variables) => Klik OK (System Properties) => Restart komputer anda.
- 7 Setelah komputer sudah hidup kembali, buka comand prompt, lalu ketik :
mvn clean install , jika berhasil akan keluar seperti dibawah ini :

```
C:\WINDOWS\system32\cmd.exe
Microsoft Windows XP [Version 5.1.2600]
(C) Copyright 1985-2001 Microsoft Corp.

C:\Documents and Settings\Endy Muhardin>mvn clean install
[INFO] Scanning for projects...

```

- 8 Jika hasil seperti gambar di atas keluar, maka Installasi Maven selesai.

Latihan 2 : Build Tools (pembuatan project sederhana)

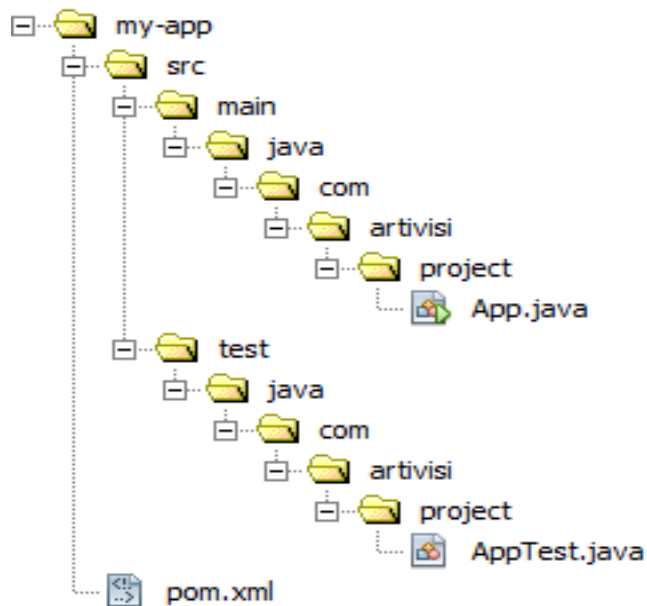

- 1 Ketikkan perintah dibawah ini untuk membuat sebuah project dari archetype :

```
mvn archetype:create -DgroupId=com.artivisi.project  
-DartifactId=my-app
```

- 2 Jika berhasil akan muncul seperti di bawah ini :

```
C:\Documents and Settings\Endy Muhardin>mvn archetype:create  
-DgroupId=com.artivisi.project -DartifactId=my-app  
[INFO] Scanning for projects...

```

- 3 Jika tidak ada kesalahan, maka pada komputer akan terbuat sebuah direktori dengan struktur seperti gambar dibawah ini :

- 4 Untuk menjalankannya, masuk ke direktori my-app dulu, dengan perintah `cd my-app`.
- 5 lalu jalankan perintah seperti dibawah ini, untuk melakukan `mvn clean install`.
- 6 Jika berhasil akan muncul seperti di bawah ini :

```
C:\Documents and Settings\Endy Muhardin\my-app>mvn clean install
[INFO] Scanning for projects...
